

CitiPower Communications and Power Quality

Project: Communications and Power Quality

Client: CitiPower Ltd

Location: Melbourne

Contract Value: AUS \$600,000 p.a.

Contract Duration: July 1998 to April 2004

CitiPower recently renewed the Communications and Power Quality contract with Electrix Pty Ltd for a further two year term, following the successful completion of previous contracts which extended back to mid 1998.

Electrix's contract provides CitiPower with the following services:

- network communications maintenance;
- 24 hour emergency breakdown service;
- customer load monitoring;
- quality of supply measurement;
- high voltage testing of distribution assets; and
- thermal imaging surveys on high/low voltage feeders and assets.

Powerline interference investigations are also being carried out by this specialised workforce to improve the Radio and Television reception to CitiPower's customers.

The increasing demand for the services of this specialised group has increased Electrix's market share in Victoria.
