

CitiPower Public Lighting Maintenance

Project: Public Lighting Maintenance

Client: CitiPower Ltd

Location: Melbourne, Victoria

Contract Value: AUS \$ 500,000 - \$800,000 p.a.

Contract Duration: April 1998 - April 2003

Electrix Pty Ltd has received praise from CitiPower for introducing innovative and cost-saving work methods and consistently meeting Public Lighting GSL reporting targets.

Services provided to CitiPower include the:

- repair of single and area light outages;
- underground fault finding and the arrangement of temporary overhead supplies;
- nightly patrols;
- capital works; and
- other miscellaneous tasks.

Electrix has successfully demonstrated significant improvements to the process including directly updating CitiPower's Public Lighting reporting system and meeting all light patrol target dates, whilst achieving conformance to Occupational Health and Safety and work procedures.

Regular monthly audits carried out by CitiPower highlight an absence of LTI's and non-conformances.

Mr Tony Mash from CitiPower, has reported that "CitiPower and the Victorian Police were both very pleased and grateful for the quick response to lighting concerns during Melbourne's Moomba festival".

The contract has recently been extended on several occasions and is current until April 2003.
