

# Clear Communications Building Takapuna

**Project:** Supply, installation and commissioning of electrical system.

**Client:** Arrow International (for Clear Communications)

**Location:** Takapuna, Auckland

**Contract Value:** NZ\$2.3m

Electrix was commissioned to complete the base contract for LV voltage reticulation, general lighting and power, installation of the 11kV cable, switchgear and transformer for the Clear Communications Building on the North Shore in Auckland. The project took a period of 18 months to complete and at its peak, employed a total of 16 staff.

The fitout contract was also secured for the lighting of 180,000sqm of office space, utilising the Dynalite intelligent lighting control system with the incorporation of a stand-by generator also included.

During the course of the project the Electrix team laid 25,700 metres of cable, installed over 3,500 light fittings and approximately 4,500 power outlets.

Electrix successfully completed the project, exceeding the client's expectations for time, budget and quality.
