

Railside Place Electrical Building Services

Project: Electrical building services for the Construction of 18 industrial units

Client: Hawkins Construction for Tristar Group.

Location: Hamilton

Contract Value: NZ\$115,000

This project included the design and installation of the electrical systems from the supply distribution pillar to the individual MSB's in each unit and the internal layouts.

Some modifications were also accommodated based on the individual owner requirements.

Internal telephone wiring for each unit was also installed at the prewiring stages.

Construction took place over a four month period
