PNOR - Contract Award

PNOR Auckland has recently been awarded Auckland City Hospital, HV Electrical Works for ADHB New Substation Contract.

Under this Contract, we need to supply and install two (9 bay) 11kV switchboards and associated auxiliary systems in the new substation building. The new substation will receive two new Vector 11kV incomers. The project is to provide a more reliable electricity supply to the Hospital.

This \$2.2million project is key to Electrix as it is an opportunity to secure stage 2 of this project and ongoing HV Maintenance work.
